Research Focus

Minimalistic Robot Swarms	Simple proximity encounters as information sources in robot swarms
Statistical Mechanics In Robotics	Design of predictable emergent behaviors in robot swarms enabled by statistical mechanics
Resilient Multi-Robot Teams	Task allocation and task execution in multi-robot systems for long-term operations

Education

Georgia Institute of Technology

Atlanta, GA

PHD IN ELECTRICAL AND COMPUTER ENGINEERING

August. 2016 - Dec. 2019

- Thesis: *Local Encounters in Robot Swarms: from Localization to Density Regulation*
- Advisor: Magnus Egerstedt
- GPA: 4.0/4.0

Georgia Institute of Technology

Atlanta, GA

MASTERS IN ELECTRICAL AND COMPUTER ENGINEERING

August. 2014 - May 2016

- Thesis: *Safe open-loop strategies for handling intermittent communications in multi-robot systems*
- Advisor: Magnus Egerstedt
- GPA: 4.0/4.0

Manipal Institute of Technology

Manipal, India

B.E. IN ELECTRONICS AND COMMUNICATION ENGINEERING

August. 2010 - June 2014

- Received 100% scholarship on college tuition.
- GPA: 8.98/10.00

Professional Appointments

Georgia Institute of Technology

Atlanta, GA

GRADUATE RESEARCH ASSISTANT (PHD)

Aug. 2016 - Dec. 2019

- Co-Designer of the Brushbot: a vibration-driven robot designed for large-scale low cost deployment (2019).
- Investigated how concepts from active matter physics can be used to achieve non-uniform densities in robot swarms (2018-2019).
- Developed an optimization framework for minimum energy task allocation in a team of robots with heterogeneous capabilities (2018).
- Developed algorithms to use inter-robot proximity encounters as an information source for achieving decentralized density regulation, localization and task allocation (2016-2018).
- Served as a firmware developer, circuit-board designer for the Robotarium project: an open-access swarm robotics platform at Georgia Tech (2015-2018).

Arizona State University

Tempe, AZ

VISITING SCHOLAR WITH DR. STEPHEN PRATT, SCHOOL OF LIFE SCIENCES

May 2018 - June 2018

- Investigated how *Temnothorax Rugatulus* ants utilize inter-ant encounters to detect quorum.
- Performed experiments on *Temnothorax Rugatulus* ant colonies with the aim of achieving non-uniform ant densities within the nest.
- Investigated the emergence of reverse tandem runs during disrupted emigrations of ant colonies.
- Used Open-CV to track the moving positions of ants within a colony via a camera.

Georgia Institute of Technology

Atlanta, GA

GRADUATE RESEARCH ASSISTANT (MASTERS)

Aug. 2015 - May 2016

- Developed reachability-based methods for handling intermittent communications in multi-robot systems.
- Developed an optimization based power-saving hybrid control strategy for multi-robot systems.
- Design and development of the GRITSBot: an open-source robot for use on the Robotarium.

Tesla Motors

Palo Alto, CA

AUTOPILOT INTERN

May 2015 - Aug. 2015

- Conceptualized schemes to diagnose anomalous driving conditions and realized them in embedded C. These schemes detect potentially dangerous conditions by taking into account factors such as vehicle dynamics, driver reaction times and current road parameters.
- Developed a Software-In-Loop simulator to compute safety performance metrics using test-drive data.
- Implemented MATLAB scripts to automatically facilitate cross-checking of the simulator output with field data and generate statistics to fine tune the design parameters.
- Implemented a spline interpolation method to generate estimates of the road curvature based on intermittent trajectory and GPS data.

Manipal Institute of Technology

TEAM LEAD, PARIKSHIT STUDENT SATELLITE TEAM

Manipal, India

March 2011 - Dec. 2013

- Designed and successfully tested a three-axis PID control system for stabilization of the satellite.
- Managed a team of 7, supervising and aiding the design of attitude estimation algorithms, orbit determination algorithms, hardware design and system integration.
- Incorporated the Attitude Determination and Control System algorithm into the Real Time Operating System (RTOS) of the satellite. This included addressing various scheduling issues and developing firmware code.
- Designed and developed an integrated satellite environment simulator in MATLAB featuring modules for torque analysis, performance testing and orbital positioning. The whole system was later implemented in C.
- GitHub Repository Link: <https://gist.github.com/siddharth119/c90f96c1bd18292a2db1>

Freescal Semiconductors

ANALOG & MIXED SIGNAL INTERN

Noida, India

Jan. 2014 - July 2014

- Designed and implemented Test Cases to verify specific functionalities of certain I/O Pads within a SoC.
- Deployed scripts to automate execution of test cases involving a large number of files.

Honors & Awards

2018	Among top 6 papers selected for Extended Publication in IEEE Transaction on Robotics, Robotics: Science and Systems Conference	Boston, MA
2018	Executive Vice President of Research Award for Best Poster , Career, Research and Innovation Development Conference	Atlanta, GA
2010	Full Tuition Fellowship Award , Manipal Institute of Technology	Manipal, India

Presentations

Invited Talks

Strength in Numbers: Swarm Robotics and Its Applications BHABHA ATOMIC RESEARCH CENTER Future Technologies Talk	Mumbai, India Jul. 2017
Local Interactions as Information Sources in Robot Swarms GEORGIA INSTITUTE OF TECHNOLOGY Robotics Student Seminar Series	Atlanta, GA Sept. 2018

Conference Talks and Presentations

Workshop on Resilient Robot Teams: Composing, Acting, and Learning, ICRA 2019 SPOTLIGHT TALK AND POSTER PRESENTATION “Optimal Task Allocation in Heterogeneous Multi-Robot Systems Using a Mixed Centralized/Decentralized Strategy”	Montreal, Canada May 2019
International Conference on Robotics and Automation 2019 POSTER PRESENTATION “Voluntary Retreat for Decentralized Interference Reduction in Robot Swarms”	Montreal, Canada May 2019
International Conference on Robotics and Automation 2017 SPOTLIGHT TALK AND POSTER PRESENTATION “Safe open-loop strategies for handling intermittent communications in multi-robot systems”	Singapore May 2017
Robotics: Science and Systems Conference 2017 SPOTLIGHT TALK AND POSTER PRESENTATION “Collisions as Information Sources in Densely Packed Multi-Robot Systems Under Mean-Field Approximations”	Boston, MA July 2017
Workshop on Robust Autonomy in Heterogeneous Robot Teams, RSS 2017 POSTER PRESENTATION “Robust Autonomy in Centralized Multi-Robot Systems”	Boston, MA July 2017

Teaching Experience

Research Mentoring

As a part of the ECE 8803 Special Research Topics course (Fall 2017), I provided research guidance and mentoring to 4 students over the course of a semester. This involved weekly meetings to discuss progress in their research and point them towards relevant results in the literature.

Teaching Assistant & Co-Instructor

Georgia Institute of Technology. ECE 6553: Optimal Control (Spring 2017)

Service

Peer Reviewer
