Siddharth **Mayya**

University of Pennsylvania
3401 Grays Ferry Ave, Philadelphia, PA 19146

POST DOCTORAL RESEARCHER · *Robotics* · *Bio-Physics Inspired Robot Swarms* · *Resilient Robot Teams*

☐ (+1) 2674249734 | ✉ mayya@seas.upenn.edu | ⌂ www.sidmayya.com

Research Focus

Minimalistic Robot Swarms	Simple proximity encounters as information sources in robot swarms
Statistical Mechanics In Robotics	Design of predictable emergent behaviors in robot swarms enabled by statistical mechanics
Resilient Multi-Robot Architectures	Leveraging heterogeneity for demonstrable resilience in multi-robot teams

Education

Georgia Institute of Technology — *Atlanta, GA*
PHD IN ELECTRICAL AND COMPUTER ENGINEERING — *August. 2016 - Dec. 2019*
- *Thesis: Local Encounters in Robot Swarms: from Localization to Density Regulation*
- Advisor: Magnus Egerstedt
- GPA: 4.0/4.0

Georgia Institute of Technology — *Atlanta, GA*
MASTERS IN ELECTRICAL AND COMPUTER ENGINEERING — *August. 2014 - May 2016*
- *Thesis: Safe open-loop strategies for handling intermittent communications in multi-robot systems*
- Advisor: Magnus Egerstedt
- GPA: 4.0/4.0

Manipal Institute of Technology — *Manipal, India*
B.E. IN ELECTRONICS AND COMMUNICATION ENGINEERING — *August. 2010 - June 2014*
- Received 100% scholarship on college tuition.
- GPA: 8.98/10.00

Professional Appointments

University of Pennsylvania — *Philadelphia, PA*
POST DOCTORAL RESEARCHER (GRASP LAB, ADVISOR: VIJAY KUMAR) — *Jan. 2020 - Jul. 2021 (expected)*
- Developed a resilient task allocation paradigm for heterogeneous multi-robot systems (2020).
- Contributed towards algorithms for distributed coverage control using graph neural networks (2020).
- Closed-loop control of ensemble clustering in a swarm of 500 vibro-actuated micro-bristlebots (2020).

Georgia Institute of Technology — *Atlanta, GA*
GRADUATE RESEARCH ASSISTANT (PHD, ADVISOR: MAGNUS EGERSTEDT) — *Aug. 2016 - Dec. 2019*
- Co-Designer of the Brushbot: a vibration-driven robot designed for large-scale low cost deployment (2019).
- Investigated how concepts from active matter physics can be used to achieve non-uniform densities in robot swarms (2018-2019).
- Developed an optimization framework for minimum energy task allocation in a team of robots with heterogeneous capabilities (2018).
- Developed algorithms to use inter-robot proximity encounters as an information source for achieving decentralized density regulation, localization and task allocation (2016-2018).
- Served as a firmware developer, circuit-board designer for the Robotarium project: an open-access swarm robotics platform at Georgia Tech (2015-2018).

Arizona State University — *Tempe, AZ*
VISITING SCHOLAR WITH DR. STEPHEN PRATT, SCHOOL OF LIFE SCIENCES — *May 2018 - June 2018*
- Investigated how *Temnothorax Rugatulus* ants utilize inter-ant encounters to detect quorum.
- Performed experiments on *Temnothorax Rugatulus* ant colonies with the aim of achieving non-uniform ant densities within the nest.
- Investigated the emergence of reverse tandem runs during disrupted emigrations of ant colonies.
- Used Open-CV to track the moving positions of ants within a colony via a camera.

Georgia Institute of Technology — *Atlanta, GA*
GRADUATE RESEARCH ASSISTANT (MASTERS) — *Aug. 2015 - May 2016*
- Developed reachability-based methods for handling intermittent communications in multi-robot systems.
- Developed an optimization based power-saving hybrid control strategy for multi-robot systems.
- Design and development of the GRITSBot: an open-source robot for use on the Robotarium.

Tesla Motors
Palo Alto, CA

<small>Autopilot Intern</small>
May 2015 - Aug. 2015

- Conceptualized schemes to diagnose anomalous driving conditions and realized them in embedded C. These schemes detect potentially dangerous conditions by taking into account factors such as vehicle dynamics, driver reaction times and current road parameters.
- Developed a Software-In-Loop simulator to compute safety performance metrics using test-drive data.
- Implemented MATLAB scripts to automatically facilitate cross-checking of the simulator output with field data and generate statistics to fine tune the design parameters.
- Implemented a spline interpolation method to generate estimates of the road curvature based on intermittent trajectory and GPS data.

Manipal Institute of Technology
Manipal, India

<small>Team Lead, Parikshit Student Satellite Team</small>
March 2011 - Dec. 2013

- Designed and successfully tested a three-axis PID control system for stabilization of the satellite.
- Managed a team of 7, supervising and aiding the design of attitude estimation algorithms, orbit determination algorithms, hardware design and system integration.
- Incorporated the Attitude Determination and Control System algorithm into the Real Time Operating System (RTOS) of the satellite. This included addressing various scheduling issues and developing firmware code.
- Designed and developed an integrated satellite environment simulator in MATLAB featuring modules for torque analysis, performance testing and orbital positioning. The whole system was later implemented in C.
- GitHub Repository Link: https://gist.github.com/siddharth119/c90f96c1bd18292a2db1

Freescale Semiconductors
Noida, India

<small>Analog & Mixed Signal Intern</small>
Jan. 2014 - July 2014

- Designed and implemented Test Cases to verify specific functionalities of certain I/O Pads within a SoC.
- Deployed scripts to automate execution of test cases involving a large number of files.

Honors & Awards

2020	**US Embassy Funded Project "What can robots teach us about the Covid-19 pandemic"**, 2020 Alumni Small Grants Program	*Rome, Italy*
2018	**Among top 6 papers selected for Extended Publication in IEEE Transaction on Robotics**, Robotics: Science and Systems Conference	*Boston, MA*
2018	**Executive Vice President of Research Award for Best Poster**, Career, Research and Innovation Development Conference	*Atlanta, GA*
2010	**Full Tuition Fellowship Award**, Manipal Institute of Technology	*Manipal, India*

Presentations

Invited Talks

Strength in Numbers: Swarm Robotics and Its Applications	*Mumbai, India*
Bhabha Atomic Research Center	*Jul. 2017*
Future Technologies Talk	
Local Interactions as Information Sources in Robot Swarms	*Atlanta, GA*
Georgia Institute of Technology	*Sept. 2018*
Robotics Student Seminar Series	

Conference Talks and Presentations

Workshop on Heterogeneous Multi-Robot Task Allocation and Coordination, RSS 2020	*Online Event*
Spotlight Talk	*July 2020*
'A Resilient and Energy-Aware Task Allocation Framework for Heterogeneous Multi-Robot Systems"	
Workshop on Resilient Robot Teams: Composing, Acting, and Learning, ICRA 2019	*Montreal, Canada*
Spotlight Talk and Poster Presentation	*May 2019*
"Optimal Task Allocation in Heterogeneous Multi-Robot Systems Using a Mixed Centralized/Decentralized Strategy"	
International Conference on Robotics and Automation 2019	*Montreal, Canada*
Poster Presentation	*May 2019*
"Voluntary Retreat for Decentralized Interference Reduction in Robot Swarms"	

International Conference on Robotics and Automation 2017 *Singapore*
SPOTLIGHT TALK AND POSTER PRESENTATION *May 2017*
"Safe open-loop strategies for handling intermittent communications in multi-robot systems"
Robotics: Science and Systems Conference 2017 *Boston, MA*
SPOTLIGHT TALK AND POSTER PRESENTATION *July 2017*
"Collisions as Information Sources in Densely Packed Multi-Robot Systems Under Mean-Field Approximations"
Workshop on Robust Autonomy in Heterogeneous Robot Teams, RSS 2017 *Boston, MA*
POSTER PRESENTATION *July 2017*
"Robust Autonomy in Centralized Multi-Robot Systems"

Teaching Experience

Research Mentoring

As a part of the ECE 8803 Special Research Topics course (Fall 2017), I provided research guidance and mentoring to 4 students over the course of a semester. This involved weekly meetings to discuss progress in their research and point them towards relevant results in the literature.

As a postdoctoral researcher at the GRASP Lab, I have had the opportunity to work alongside and provide research mentorship to undegraduate and graduate students.

Teaching Assistant & Co-Instructor

Georgia Institute of Technology. ECE 6553: Optimal Control (Spring 2017)

Service

Outreach

1. Our project titled "What can robots teach us about the Covid-19 pandemic" has been funded by the US Embassy in Rome via the 2020 Alumni Small Grants Program. This involves organizing and conducting tutorials, seminars, and hackathons for high-school and undergraduate students at multiple locations in Italy.

2. As part of the Robotarium project, I participated in robotics outreach programs for K-12 students from diverse backgrounds across the US.

Peer Reviewer

1. IEEE Transactions on Robotics (T-RO)
